

Jinhyeok Kim

Artificial Intelligence Graduate | Business Analysis | Market Research | Data-Driven Decision Support

Sydney, NSW, Australia | 0468 544 027 | winsuwon127@gmail.com | Portfolio: jinhyeok-portfolio-amber.vercel.app | GitHub: github.com/Jinhyeok513

Professional Summary

AI graduate with data analysis, structured research, evidence review and Korean-English communication capability. Experienced in evaluating data sources, finding gaps, preparing reports and translating technical work into practical recommendations.

Core Skills

Business research | Data-source evaluation | Gap analysis | Comparative analysis | Structured reporting | Data cleaning
Microsoft Excel | Charts | PivotTables | Python | Pandas | NLP
Presentation preparation | Korean-English communication | Chinese HSK Level 4

Education

Bachelor of Artificial Intelligence - Completed 2026

University of Technology Sydney (UTS), Sydney, Australia

- Graduated with Distinction; WAM 77.94 and GPA 5.88/7.00.
- Relevant study included data analytics, machine learning, computer vision, generative AI, software development and business information systems.

Diploma of Information Technology - 2023

UTS College, Sydney, Australia

- Built foundations in Python and Java programming, web systems, system analysis, technical documentation and business information systems.

Selected Project Experience

BioGeoDA - Australian Plant Data Integration and AI-Assisted Trait Extraction | 2025-2026

UTS AI/Analytics capstone team project and public portfolio reconstruction | Python | Pandas | NLP | TF-IDF | Logistic Regression | BERT QA | Streamlit | GitHub

- Analysed structured and unstructured plant-trait sources to identify information gaps and convert source evidence into usable trait records.
- Built NLP workflows using TF-IDF, Logistic Regression and BERT QA to compare keyword-based and context-based extraction methods.
- Contributed to team validation of 844 retained records from more than 2,400 generated candidates, supporting evidence-based reporting rather than unreviewed automation.

Event Management System Project Plan - Team Lead | 2025

Academic Project Management Case Study | Project Management | Excel | WBS | AON | Gantt scheduling | Risk and budget planning

- Led team coordination and report integration for an academic business-system planning scenario with budget, stakeholder, risk and resource components.
- Prepared planning outputs that translated broad business requirements into scope, milestones, risks and operational assumptions.

AI Gym Trainer - Exercise Video Analysis Application | 2025-2026

Portfolio AI application | Python | Next.js | FastAPI | MobileNetV2 | MediaPipe Pose | OpenCV | CSV/JSON export

- Built an end-to-end video analysis workflow covering upload, preprocessing, exercise classification, pose extraction, annotated video output and session reporting.
- Integrated MobileNetV2 classification with MediaPipe Pose landmarks, OpenCV rendering, joint-angle calculations and rule-based feedback.

Languages

- Korean - Native
- English - Professional communication skills
- Chinese - HSK Level 4

Work Rights and Availability

Current Australian work-rights details and full-time availability available on request.
