

Jinhyeok Kim

Artificial Intelligence Graduate | Data Reporting | Logistics Support | Process Monitoring

Sydney, NSW, Australia | 0468 544 027 | winsuwon127@gmail.com | Portfolio: jinhyeok-portfolio-amber.vercel.app | GitHub: github.com/Jinhyeok513

Professional Summary

Data-oriented AI graduate with Excel, reporting, process monitoring, data maintenance and project coordination skills. Brings careful evidence handling, Korean-English communication and structured problem solving for logistics support environments.

Core Skills

Excel reporting | Data reconciliation concepts | Data maintenance | Process monitoring | Exception identification | Cost and resource estimation

Schedule monitoring | Vendor coordination planning | Microsoft Excel | PivotTables | Lookup functions | Python

Pandas | Korean-English communication

Education

Bachelor of Artificial Intelligence - Completed 2026

University of Technology Sydney (UTS), Sydney, Australia

- Graduated with Distinction; WAM 77.94 and GPA 5.88/7.00.
- Relevant study included data analytics, machine learning, computer vision, generative AI, software development and business information systems.

Diploma of Information Technology - 2023

UTS College, Sydney, Australia

- Built foundations in Python and Java programming, web systems, system analysis, technical documentation and business information systems.

Selected Project Experience

BioGeoDA - Australian Plant Data Integration and AI-Assisted Trait Extraction | 2025-2026

UTS AI/Analytics capstone team project and public portfolio reconstruction | Python | Pandas | NLP | TF-IDF | Logistic Regression | BERT QA | Streamlit | GitHub

- Maintained traceable data outputs by preserving source, page, paragraph and context metadata through extraction and validation workflows.
- Cleaned and standardised multi-source records by checking missing values, duplicates, naming inconsistency and mixed trait formats.
- Used structured review to support reliable reporting from more than 2,400 generated candidate records.

Event Management System Project Plan - Team Lead | 2025

Academic Project Management Case Study | Project Management | Excel | WBS | AON | Gantt scheduling | Risk and budget planning

- Coordinated schedule, cost and resource estimates across more than 100 tasks in an academic logistics-heavy event-system planning scenario.
- Reviewed vendor coordination, site preparation, risk, budget and closeout components within an 18-month simulated delivery plan.

Tennis Ball Tracking and Trajectory Visualisation | 2025

Computer-vision portfolio project | Python | OpenCV | NumPy | Kalman filtering | FFmpeg | IoU/CLE evaluation

- Implemented a Kalman-filter tracking pipeline using HSV colour cues, whiteness cues, optical flow, blobness scoring, court masking and net-region suppression.
- Packaged a 207-frame tracking output with representative frame captures, trajectory visualisation and frame-level diagnostics.

Languages

- Korean - Native
- English - Professional communication skills
- Chinese - HSK Level 4

Work Rights and Availability

Current Australian work-rights details and full-time availability available on request.
